Mad Stats quick guide

Tag Gaelic football matches from video or the sideline, and get match, season and scouting reports.

Open it at **madstats26.github.io/MadStats**

1. Getting started

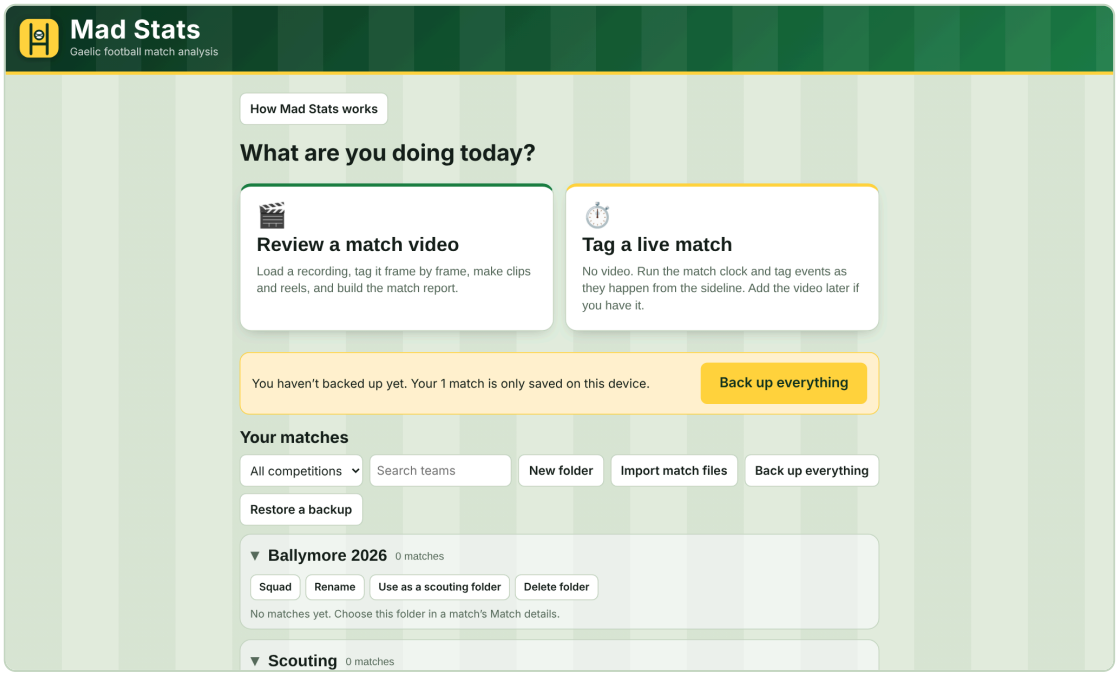

1. **Open the link** in Chrome, Edge or Safari on a laptop, tablet or phone. Nothing to download or sign up for.
2. **Install it (optional).** Laptop: click the install icon at the right of Chrome's address bar. iPhone/iPad: Safari → Share → *Add to Home Screen*. Android: Chrome menu ⋮ → *Install app*. Once installed it opens in its own window and works without internet.
3. **Set up your team.** The first time, type your team name, pick a colour and save. This creates a folder for your season and a Scouting folder.
4. **Try the sample match.** Tap *Open a sample match* to explore the stats and report with made-up data before you tag anything. Delete it from the home page when you're done.

The welcome screen. Your team details are asked for first.

> **Important:** everything is saved on the device you use, and match videos are never uploaded. Use **Back up everything** on the home page every week or two and keep the file somewhere safe (email it to yourself, or save it to Google Drive or iCloud).

2. The home page

Choose a mode at the top. Your matches are listed below in folders.

- **Review a match video**: load a recording, tag it, draw on it, make clips and reels.
- **Tag a live match**: no video; a running match clock and big buttons for the sideline.
- **Your matches**: sorted into folders, then by season and competition, with each group's record. Use **Open** or **Delete** on any match. Search and filter at the top.
- Each folder has **Squad**, **Season report**, **Rename** and **Delete folder** (deleting a folder never deletes its matches).
- Tap the **Mad Stats** title, or **← Back to home** at the bottom, to return here at any time.

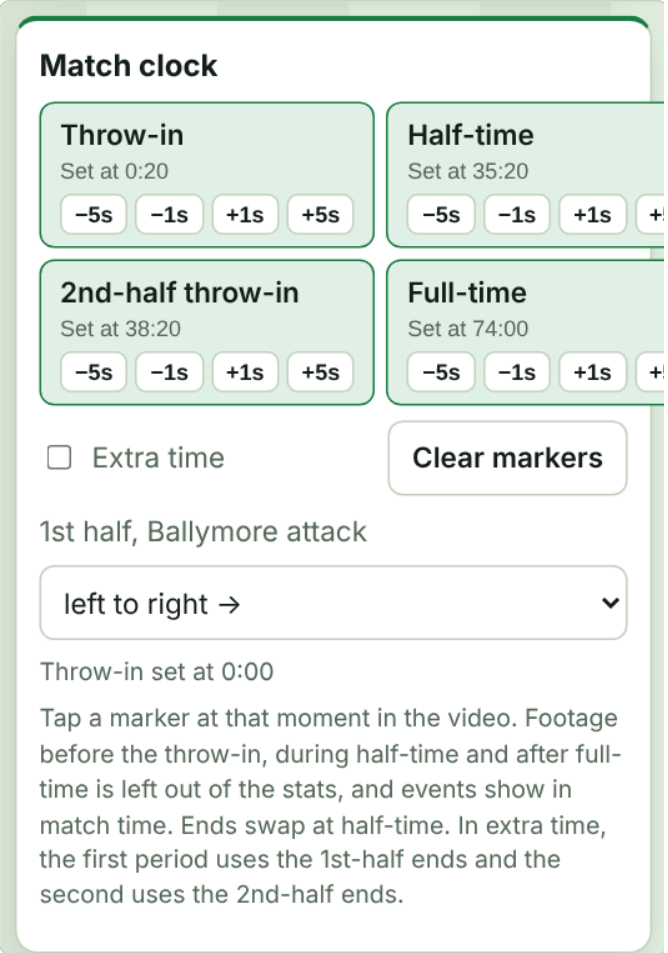

3. Set the match clock

Tap the four markers **at the moment they happen**: *Throw-in*, *Half-time*, *2nd-half throw-in*, *Full-time* (and extra time if needed).

This is what lets Mad Stats:

- split every stat by half;
- leave stoppages out of the stats;
- show events as match time, e.g. “24th min, 2nd half”;
- know which goal each team attacks, so kickouts and shots are drawn from the right end.

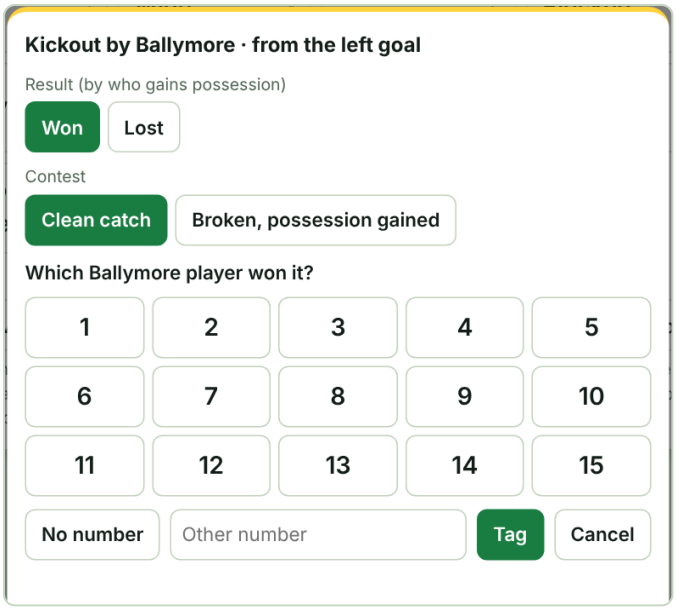

Also set which way **your team attacks in the 1st half**. Ends swap automatically at half-time. Tapped a marker late? Use the **−5s / +5s** buttons under it.

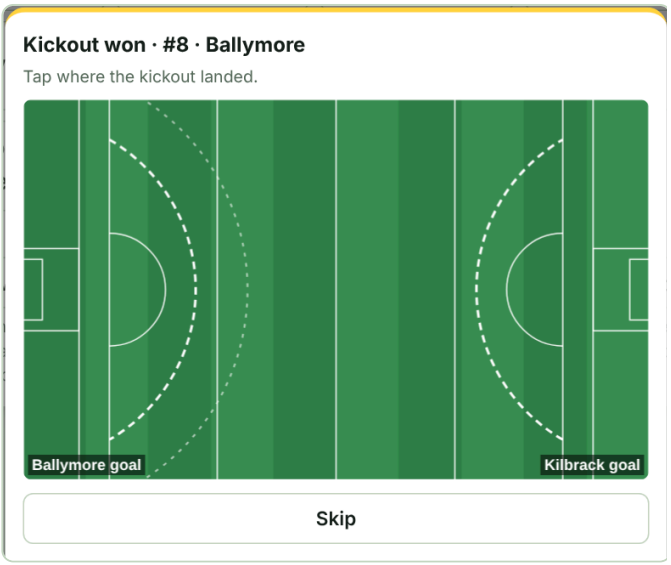

The Match clock in video mode. In live mode it’s one big button that moves through the stages.

4. Tagging an event

1. **Pick the team** (your team or the opposition).
2. **Tap the event**: Point, Two-pointer, Goal, Wide, Kickout, Turnover won or lost, Free won or conceded, and so on.
3. **Add the details** it asks for, e.g. a kickout’s result and whether it was a clean catch or broken; how a turnover happened; whether a shot was from play or a free.
4. **Choose the player’s number**. Names show under the numbers once you’ve added your squad. *No number* is fine if you didn’t see who it was.
5. For scores, it asks **who set it up** (assist). Tap *No assist* to skip.
6. **Tap where it happened** on the pitch: where a kickout landed, or where a shot was taken from. Points from outside the 40m arc become two-pointers automatically.

Details and player for a kickout.

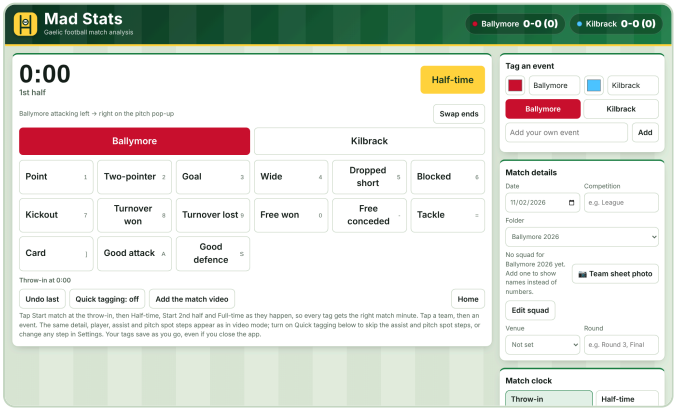

Then tap where it landed. Each goal is labelled with its team.

Good to know

- A turnover or free only needs tagging once: lost by one team counts as won by the other.
- **Quick tagging** (live screen and Settings) skips the assist and pitch steps when the game is frantic.
- Made a mistake? Use **Undo last** (live), the ✕ on an event then **Undo**, or **Edit** to change any detail, time or pitch spot.
- Laptop shortcuts: `Space` play/pause, `←` `→` jump 5 seconds, `T` switch team, number keys for events (shown on each button).

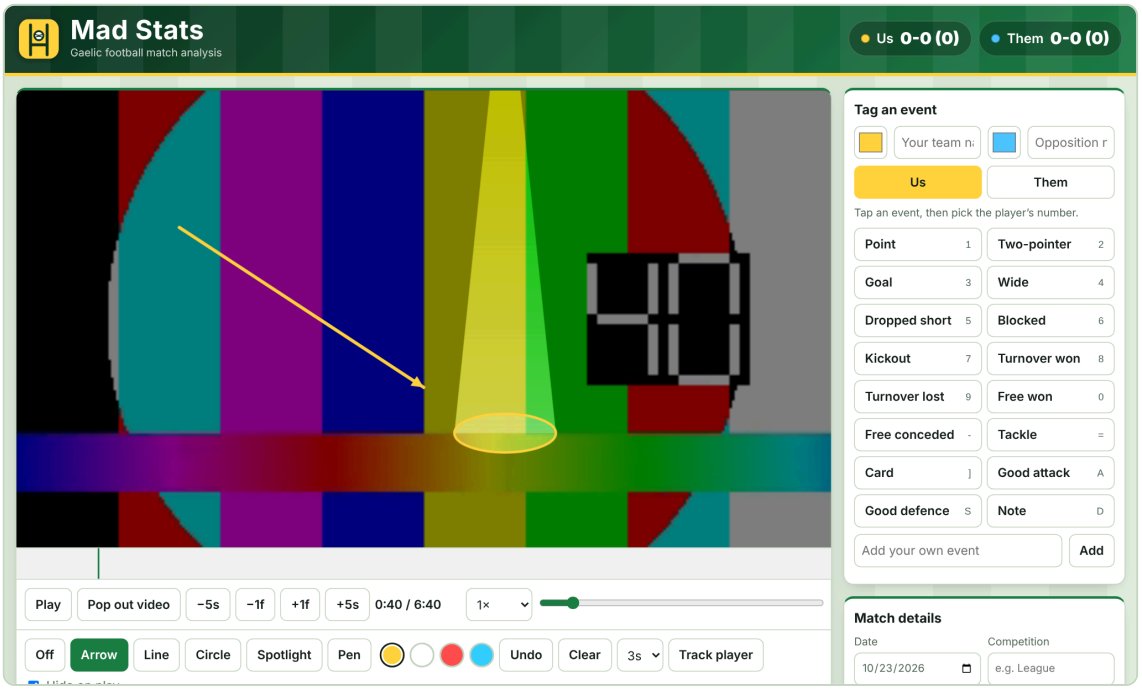

5. Tagging a live match

The live screen: clock, team buttons and big event buttons.

- Tap **Start match** at the throw-in. The same button becomes Half-time, Start 2nd half and Full-time.
- Everything saves as you go. Closing the app or the phone locking loses nothing.
- **Swap ends** if you're on the other side of the pitch.
- **Several taggers:** each person tags on their own phone, so split the jobs (e.g. one on shots, one on kickouts and turnovers). Make sure everyone taps Start match at the throw-in. Afterwards each taps *Save match file* and sends it to you; select them all in *Load match file* and they merge, lined up by the throw-ins.
- **Got the video later?** Tap **Add the match video**, find the throw-in and 2nd-half throw-in in the recording, and every live tag moves to its moment in the video.

6. Reviewing a match video

Video review on a laptop, with an arrow and a spotlight drawn on the frame.

- **Load match video**: choose the file (MP4 works best). The video stays on your computer.
- **Drawing tools**: Arrow, Line, Circle, Spotlight and Pen. Pause, pick a tool and drag on the video. *Track player* makes a spotlight follow a player for a few seconds.
- **Pop out video** opens the video in its own window. Put it on a second screen or TV and keep tagging in the main window.
- **Events list**: tap any event to jump to it. Use the filter to pick one or more event types, a team or a player.
- **Reels**: *Play reel* plays every event in the current filter. *Save reel* keeps it (e.g. “All kickouts”), and *Export reel* saves it as a video with captions to send to players.
- **Clips**: set a start and end (or *From last event*), add drawings that pause the video, then save or export.

7. Reports

Match report

Tap **Generate match report** in the Summary panel (the Stats tab on a phone) to save a PDF. It includes:

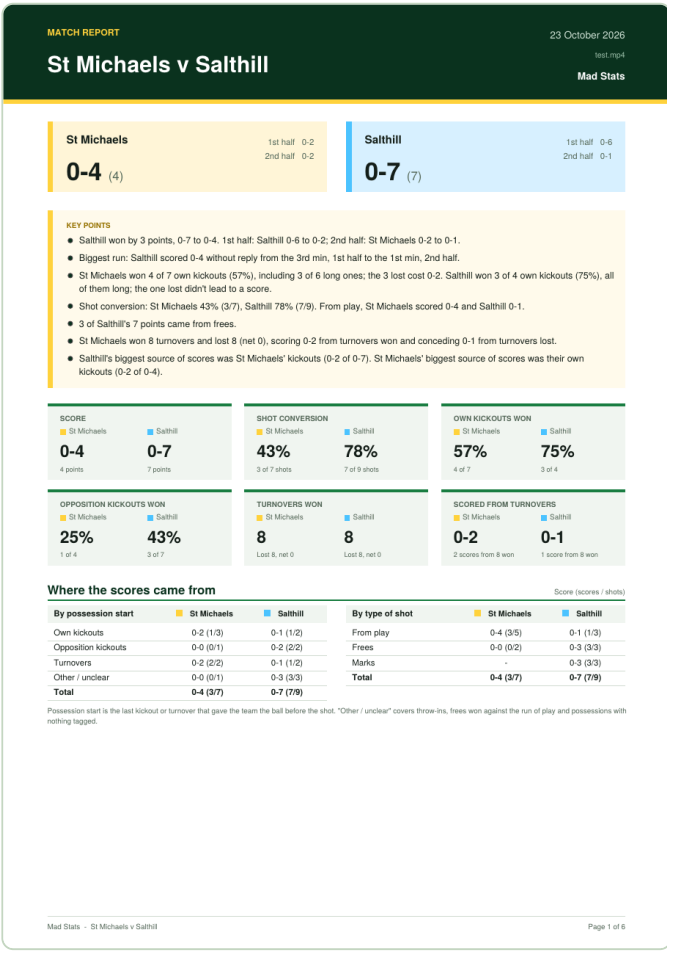

- score by half, key points and KPIs;
- where the scores came from;
- score timeline;
- kickout and shot maps with heat maps;
- discipline;
- full stats, turnovers and player tables.

On a phone, **Share report** sends it straight to WhatsApp or email.

Season and scouting reports

On the home page, use **Season report** on a team folder, or the report button on any season or competition group. In the Scouting folder each team has **Scouting report on …**, built from every match you have with them.

Includes the record, match-by-match table, trend charts, combined maps and a season player table.

MATCH REPORT

St Michaels v Salthill

23 October 2026

test.mp4

Mad Stats

St Michaels	Salthill
1st half 0-2	1st half 0-6
2nd half 0-2	2nd half 0-1
0-4 (4)	0-7 (7)

KEY POINTS

- Salthill won by 3 points, 0-7 to 0-4. 1st half: Salthill 0-6 to 0-2; 2nd half: St Michaels 0-2 to 0-1.
- Biggest run: Salthill scored 0-4 without reply from the 3rd min, 1st half to the 1st min, 2nd half.
- St Michaels won 4 of 7 own kickouts (57%), including 3 of 6 long ones; the 3 lost cost 0-2. Salthill won 3 of 4 own kickouts (75%), all of them long; the one lost didn't lead to a score.
- Shot conversion: St Michaels 43% (3/7), Salthill 78% (7/9). From play, St Michaels scored 0-4 and Salthill 0-1.
- 3 of Salthill's 7 points came from frees.
- St Michaels won 8 turnovers and lost 8 (net 0), scoring 0-2 from turnovers won and conceding 0-1 from turnovers lost.
- Salthill's biggest source of scores was St Michaels' kickouts (0-2 of 0-7). St Michaels' biggest source of scores was their own kickouts (0-2 of 0-4).

SCORE		SHOT CONVERSION		OWN KICKOUTS WON	
St Michaels	Salthill	St Michaels	Salthill	St Michaels	Salthill
0-4	0-7	43%	78%	57%	75%
4 points	7 points	3 of 7 shots	7 of 9 shots	4 of 7	3 of 4

OPPOSITION KICKOUTS WON		TURNOVERS WON		SCORED FROM TURNOVERS	
St Michaels	Salthill	St Michaels	Salthill	St Michaels	Salthill
25%	43%	8	8	0-2	0-1
1 of 4	3 of 7	Lost 8, net 0	Lost 8, net 0	2 scores from 8 won	1 score from 8 won

Where the scores came from — Score (scores / shots)

By possession start	St Michaels	Salthill
Own kickouts	0-2 (1/3)	0-1 (1/2)
Opposition kickouts	0-0 (0/1)	0-2 (2/2)
Turnovers	0-2 (2/2)	0-1 (1/2)
Other / unclear	0-0 (0/1)	0-3 (3/3)
Total	**0-4 (3/7)**	**0-7 (7/9)**

By type of shot	St Michaels	Salthill
From play	0-4 (3/5)	0-1 (1/3)
Frees	0-0 (0/2)	0-3 (3/3)
Marks	-	0-3 (3/3)
Total	**0-4 (3/7)**	**0-7 (7/9)**

Possession start is the last kickout or turnover that gave the team the ball before the shot. "Other / unclear" covers throw-ins, frees won against the run of play and possessions with nothing tagged.

Mad Stats · St Michaels v Salthill — Page 1 of 6

Page 1 of a match report.

> For good reports: set the match clock, tap the pitch spot for kickouts and shots, and fill in **Match details** (date, competition, folder). Before building a report, Mad Stats tells you if any kickouts or shots are missing a pitch spot and lets you add them.

8. Squad and team sheets

- On the home page, tap **Squad** on your team folder and type or paste one player per line with their usual number, e.g. *14 Conor Walsh*.
- 📷 **Read from photo** reads a **printed** team sheet (most championship sheets). If the sheet has both teams, it asks which one; check the list, then tap *Use these*. Handwritten sheets don't read well.
- If numbers change on the day, use **Team sheet** or 📷 **Team sheet photo** in that match's Match details.
- Names then appear in the player picker, the events list, the Players table and the reports.

9. Your data

To…	Use
Back up everything	**Back up everything** on the home page or in Settings saves one file with every match, folder and squad. **Restore a backup** brings it back; it only adds what's missing.

Move one match to another device	**Save match file** (Summary panel), then **Import match files** on the home page of the other device.
Combine taggers' files	Open the match, then **Load match file** and select all the files.
Get the raw data	**Download CSV** opens in Excel or Google Sheets.
Change tagging options	**Settings** (Stats tab on a phone): quick tagging, assists, pitch spot, automatic two-pointers, extra shot types (mark, 45, penalty), foot or hand.

10. Common questions

Kickouts or shots appear at the wrong end	Check the Match clock: set the half-time and 2nd-half throw-in markers, and set which way your team attacks in the 1st half.
Stats aren't split by half	The match clock markers aren't set yet.
"Led to a score": how is it counted?	A turnover leads to a shot or score if the team that won it shoots before losing the ball again (a kickout, turnover, free to the other team or end of the half).
Kickout "won"	Decided by which team gains possession, including from a break.
My matches disappeared	They're saved in the browser you tagged in. Open the same browser on the same device, or use Restore a backup. On iPhone, install the app to the home screen so Safari doesn't clear it.
There's a "new version" message	Tap **Update now**. Your matches are kept; you may need to reopen the video.
Clip or reel export won't work	Use Chrome or Edge on a laptop, and keep the tab open while it records (it plays in real time).

Found a problem or have an idea? Tell the person who sent you Mad Stats.
